# WHAT YOU GET – THE ONE PAGE POWERTSM® WHITE PAPER.

PowerTSM(R) allows time series data to be stored and visualized graphically and in tabular form.

Data can be processed both manually and automatically.

For this purpose, both an application and a REST API are available.

Application and REST API are documented and supported by video tutorials.

**REST API** — Powerful, load-balanced FeasyUse® http API - for managing time series.

Interface

**PowerTSM® App** — Spread sheet application for reviewing time series in a graphical user interface.
